SUMMARY

Programmer with 3 years of experience building and maintaining enterprise applications using VB.NET, C#, .NET (MVC/Web API), and MSSQL, with hands-on experience in RPA automation (Playwright) and direct user requirement gathering. Self-driven in expanding full-stack skills, having independently built and deployed a web application using Next.js.

PROFESSIONAL EXPERIENCE

Programmer

06/2023 – Present

BETTER WORLD GREEN PUBLIC COMPANY LIMITED

- Developed and maintained **4 internal enterprise applications** as part of a 5-member development team, with individual ownership of specific modules/systems, using **VB, .NET Framework (MVC), C# WPF, and .NET Core (Web API)**
- Built an automated web scraping bot using **C# and Playwright** to extract data from the Department of Industrial Works (กรมโรงงานอุตสาหกรรม) website, enabling automated data collection for downstream business use and reducing manual data-entry work
- Optimized **Microsoft SQL Server (MSSQL)** database performance through query tuning and indexing to support application responsiveness
- Executed full **Software Development Life Cycle (SDLC)** — requirement analysis, design, development, testing, deployment, and maintenance — for internally used business applications
- Designed and developed RESTful APIs using **.NET Core** to support system integration and automation workflows

Web Developer

11/2022 – 05/2023

NEXILAR CO., LTD.

- Developed and delivered responsive web applications** for multiple clients using **Next.js** and **Tailwind CSS**
- Translated UI/UX designs into highly interactive web pages**, focusing on delivering a seamless user experience that aligns with client requirements.

EDUCATION

Bachelor of Engineering Program in Computer Engineering

06/2019 – 03/2023

University of Phayao

SKILLS

Core (Professional Experience)

VB.NET, C#, .NET Framework (MVC), .NET Core, ASP.NET Web API, WPF, Microsoft SQL Server (MSSQL), Entity Framework, LINQ, Git/Version Control, RPA & Web Automation (Playwright), API Testing (Postman, Swagger), SDLC

Additional Interests / Foundational Knowledge:

Docker, Swagger/OpenAPI, DevOps fundamentals, CI/CD Automation, Unit Testing (xUnit/NUnit)

AI-Assisted Development

Leveraged AI tools (GitHub Copilot, Claude, ChatGPT) to accelerate code development, debugging, SQL query optimization, and technical documentation, improving development efficiency and code quality

(Self-learning / Personal Projects)

React, Angular, Vue, Next.js, Nest.js

LANGUAGES

• Thai

• English
